

# Sea-Doo Challenger 2000

## Brief Summary

The Challenger 2000 is a sport boat that's designed to handle high speeds with confidence. Her sleek lines, radical look and seating for up to 8 people add up to a lot on this 20-footer.

## Price

**Base Price** \$23999.00

*Prices, features, designs, and equipment are subject to change. Please see your local dealer or visit the builder's website for the latest information available on this boat model.*

## Key Features

The Challenger 2000 is powered by a water jet pump, which gives you safety, quick acceleration and shoal draft. Bucket seats will keep you in place at high speeds and there are grabrails to hold onto when making tight turns. A ski locker is large enough for two skis or a wakeboard. On the helm side, the gauges are well laid out and easy to read, and the throttle has an elbow rest behind it to lessen driver fatigue. ## Acceleration Times & Conditions

<b>Time to Plane</b>	1.9 sec.
<b>0 to 20</b>	
<b>Ratio</b>	1.0:1
<b>Props</b>	7 1/4
<b>Load</b>	2 pers, 1/8 fuel, no water, no gear
<b>Climate</b>	80 deg, 80% humid, wind: 5-10 knots; seas: 1 foot

There are many benefits to having a jet-powered boat. With its direct-drive jet pump, it's one of the most maneuverable craft you'll drive. Jet pumps have many advantages, they add up to these four things; stronger acceleration, superior handling, better safety and improved shallow water operations. She draws only 12 inches!

The Challenger 2000 is fully loaded with an AM/FM stereo with CD player and 12-volt jack for your cell phone. There's also a built-in cooler above the console to hold a six-pack of your favorite drinks. A large ski locker in the cockpit sole is big enough for two skis or a wakeboard.

Sea-Doo has created incredible room on this 19-foot, 9-inch boat. Her bucket seats are a real neat feature and they will not only keep you in place in tight turns, but they are also comfortable. With room for eight people, you can invite all your friends aboard this versatile platform.

Another plus to the Challenger 2000 is a choice of Mercury engines, either a 200- or 240-hp powerplant. These engines were developed by Mercury especially for Sea-Doo, says the company, and both have over-rev protection, along with low oil and engine overheat warnings. The mixed-flow, high-volume jet pump gives the boat excellent acceleration. There's also a hydro-surge intake grate on the bottom of the boat to keep weeds out of the impeller.

The Challenger has 20 degrees of deadrise at the transom, which gives you the best ride possible in chop.

We measured a quick hole-shot of 1.9 seconds to be exact. Its 2,100 lbs. is heavy enough for breaking through waves, but it doesn't hold the boat back. In fact, this boat hit a top speed of 49.9 mph at 5650 rpm and her optimum cruise was at 27.6 mph at 4000 rpm. This all adds up to 109 miles of fun at best cruising speed.

Out in big water our test team was impressed with both her handling and the fact that everyone came back dry. Her 8-foot beam provided a stable ride and she cut right through waves like a samurai sword.

Once aboard the Challenger 2000 you'll begin to understand why there's so much excitement about this boat. The Challenger has much more to offer than just a fun, fast ride. She's a versatile jet boat that can be used for a number of different water activities. Besides being attractive the Challenger is also nimble, fast and has very precise handling.

We like what See-Doo has done here which is to marry jet-pump propulsion with a versatile sport boat concept. We predict you will see this concept catch on.
