

Beneteau Oceanis 46.1 (2018-)

Brief Summary

Beneteau is introducing a new sailboat model, the Oceanis 46.1, at the Sydney, Australia boat show in early August. The builder says this new boat is a progression of the Oceanis 45, and will have large-yacht features and luxurious amenities for her size.

The Beneteau Oceanis 46.1 has a hull shape derived from the design of the Oceanis 51.1. Beneteau says the Oceanis 46.1 is based on a design by Finot-Conq that uses a stepped hull based on that of the Oceanis 51.1, a boat known for her performance, comfort, features and elegance since her launch in 2017. The Oceanis 46.1 will benefit from this design, according to the builder, because the hull shape enables her to perform well under sail while still creating interior space. Beneteau says the Oceanis 46.1 incorporates the features of the larger Oceanis 48. The Oceanis 46.1 was styled by Nauta Design.

Deck Design

On deck, the cockpit is huge and ready to welcome the crew aboard with a large table that is designed for eight as well as stowing the life raft. Beneteau says guests need not be inconvenienced by sailing maneuvers, as the winches are situated close to the helm. Another advantage of placing them there is that it makes single-handed or short-handing sailing easier.

Near the companionway, reclining sun lounges serve as relaxation spots, and they also can be moved to the foredeck. The swim platform is one step from the cockpit, where a plancha grill is built-in, to be used from the platform or the cockpit.

The cockpit works with the rig for easy sailing, comfort aboard both when sailing and entertaining, to give the boat form stability.

Sailing Choices

The Oceanis 46.1 is designed to be comfortable and safe for her crew as well as simple to sail. The split rigging with internal diagonal lower shrouds and upper shrouds on the hull side, allows the headsail to be strapped in on the wind, as well as creating better access forward.

An in-mast furling system and self-tailing jib come standard, and all halyards and sheets lead aft to winches on either side of the helm station. A twin rudder system and other options and rigging plans let each yacht be customized.

Different rigging choices will accommodate a variety of sailing styles, according to Beneteau.

One version of the Oceanis 46.1 calls to mind Beneteau's racing line of boats, and the First Line model is aimed at sailors who like fast cruising, thanks to a taller mast, increased sail area, a bowsprit for a spinnaker, and a deep keel with lead bulb.

Interior Options

Inside the boat, the space is brightened by hull side windows and large skylights. Interior Joinery can be finished in satin light oak or mahogany. The owner stateroom is forward and features a separate head and shower.

Image not found or type unknown

The forward master stateroom has hull side windows and high overhead, thanks to forward hull volume.

master not found or type unknown

The master stateroom has a separate head and shower compartments to make the most of this private space.

The three-cabin version sets two uniform guest staterooms abaft the companionway and these benefit from hull side windows. One version of this layout makes all staterooms en suite, while another has the guests sharing a head.

salon not found or type unknown

The salon benefits from plenty of windows in the hull side and trunk cabin.

Two galley designs as well as four- and five-stateroom layouts are also available and divide the forward master into two staterooms. These options give the Oceanis 46.1 a wide range of choices for owners and charter companies.

layout not found or type unknown

This three-stateroom, the two-head layout makes the most of the salon area by moving the galley aft. Beneteau is using its companywide experience to deliver technically tuned-in boats throughout its product line. The Oceanis 46.1 is another example of this philosophy, with performance, comfort, and style in a platform that can adapt to a wide range of sailors.

Beneteau Oceanis 46.1 performance rig

The Beneteau Oceanis 46.1 can be specified with a performance rig for fast cruisers.
