Builder Commentary

One hundred years of success in the yachting industry is a benchmark that must be celebrated. Astondoa decided to honor the occasion by launching an exclusive, new range of compact yachts. The Coupé fleet marks an evolution towards boats that are more modern and bold. It has a unique sporty flare that is cohesive among the models in this range.

The 655 was the first model from the Coupé range to be unveiled. She is a yacht defined by clean lines and an inverted bow. The superstructure constructed from aluminum, glass and carbon fiber, give it an airy feel. While the tall hull ensures ample interior space. A glazed surface along the entire length of the hull give it a strong style and provide lots of natural light below deck.
