Builders Commentary

The 43z is ready to take on your most ambitious adventures. The Doug Zurn hull parts the waves cleanly and deflects wave action down and away for a soft, dry and stable ride. At wide-open throttle, she is capable of speeds up to 44 knots, thanks to a light, but exceptionally strong, epoxy construction and narrow, effective hull design. The 43z can not only outrun the competition, but the 43z with twin IPS bests them by as much as 50% improvement in nautical miles per gallon at higher cruising speeds. Add Category A Ocean certification by the International Standards Organization and it's easy to see why the 43z is the undisputed best-in-class.
