Builders Commentary

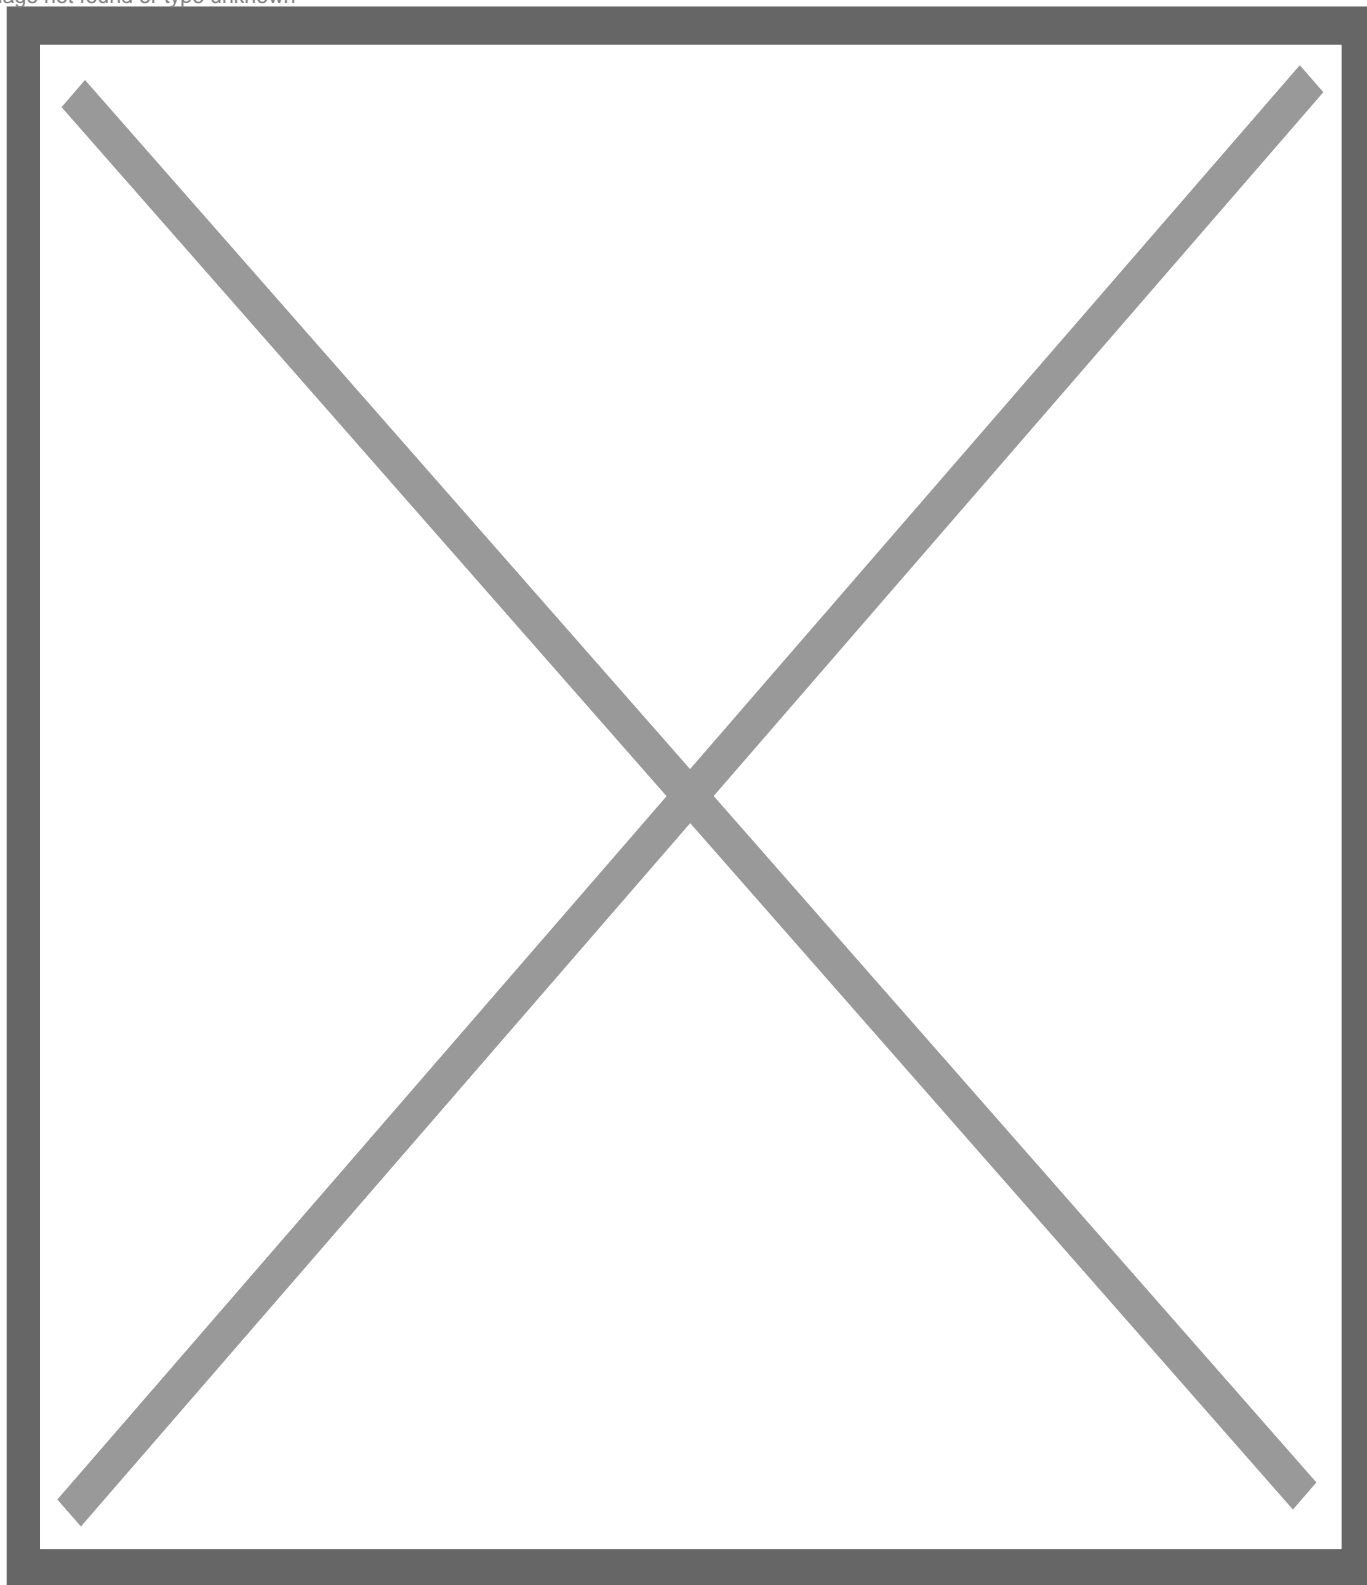

Sundeck 700 is a modern displacing-planing hull, long-range, fast trawler motor-yacht: totally project managed, engineered and manufactured in Italy. This Yacht is 21 meters long and can be built in several versions, offering several interior layouts and fittings. Yet the principal, to which this model has been designed, is to offer a huge amount of space that guests can share both in the interior and exterior, including the exceptional dimensions of the sunbed areas, which by virtue of the beam of the yacht allows.

On the foredeck, an option is a Jacuzzi-style bathtub, a sunbed area which converts to a dinette and ample storage lockers. On the flybridge a solid hard-top with an electrically opening roof can be added as well. The aft cockpit offers a nice living and relaxing space and reveals the great care in which the whole project has been thought out and designed, for example, recessed spaces for the stern winches.

Comfort and ergonomics are key factors, water in and outlets are conveniently located as is the high-pressure water pump which allows deck wash-down, with sea or freshwater. When cruising at displacement speed the Sundeck 700 burns an incredibly small quantity of fuel, whilst at top speed, the yacht can reach and exceed 25 knots still keeping economical consumption rates. The Sundeck 700 is a perfect luxury, long-range, fast trawler motor yacht to discover how pleasant life onboard can be!
